Not illustrated. 1901 Excerpt: .it was discovered in Java by Went, in 1893. Means of Control 1. Plant only healthy canes. In Hawaii and other places, it has been nd that this disease may be easily and successfully controlled by planting y healthy canes that show no sign of discoloration. Any canes showing a the slightest discoloration of the interior should be discarded. It will necessary, in sections where the disease has become prevalent, to grind the cane, and get seed cane for planting from some other locality. 2. As an extra preventive the selected canes may be dipped in Borlux mixture just before they are planted. This will kill any fungus that y have gotten onto the cut ends or surfaces. A large wooden trough convenient for holding the Bordeaux mixture while dipping. The formula, tounds of copper sulphate, 5 pounds of lime, and 50 gallons of water, may...
