Automated Systems Based on Human Skill (Joint Design of Technology and Organisation)

By Terence Martin MSc DAvMed FIMCRCSEd FRCSEd FCARCSI FRCA

Pergamon. Paperback. Book Condition: New. Paperback. 266 pages. Dimensions: 11.5in. x 8.2in. x 0.6in. These proceedings contain the papers presented at the 5th IFAC Symposium on Automated Systems Based on Human Skill, held in Berlin, Germany, 26-28 September 1995. The symposium, like previous ones in the series, brought together researchers, developers and users of complex human-machine systems. Discussions covered manufacturing, process control, aircraft and air traffic control, and administrative processes with an emphasis on how to design such systems and integrate both developers and users into the design process. The main issues addressed, therefore, were the joint engineering of production processes, information technology and work organisation and the possibility that this may lead to the re-definition of human operators in process automation. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

Reviews

If you need to adding benefit, a must buy book. It really is writter in straightforward words and phrases and not confusing. You will not feel monotony at anytime of your respective time (that's what catalogues are for concerning if you ask me).

-- **Dr. Celestino Treutel**

It becomes an awesome publication that I actually have actually read. It really is writter in simple terms and not difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.
