PRACTICAL MATHEMATICS VOLUME 3; BEING THE ESSENTIALS OF ARITHMETIC, GEOMETRY, ALGEBRA AND TRIGONOMETRY

To read **Practical Mathematics Volume 3; Being the Essentials of Arithmetic, Geometry, Algebra and Trigonometry** eBook, you should access the button listed below and save the file or have access to additional information that are in conjunction with PRACTICAL MATHEMATICS VOLUME 3; BEING THE ESSENTIALS OF ARITHMETIC, GEOMETRY, ALGEBRA AND TRIGONOMETRY book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1913 Excerpt: .an operation in algebra, carry out a similar operation using numerical numbers, and from this determine what the operation with the algebraic expressions should be. REDUCTION OF A FRACTION TO ITS LOWEST 63. A fraction is in its lowest terms when there is no factor common to both numerator and denominator. Example 1.--Reduce $\frac{f}{g}$ to its lowest terms. Here each term of the fraction is factored and then the common factors are cancelled. We handle an algebraic fraction in the same way. TERMS EXERCISES 28 Reduce the following fractions to their lowest terms: REDUCTION OF FRACTIONS TO COMMON DENOMINATORS 64. In arithmetic, fractions are reduced to a least common denominator before adding, so in literal fractions we change the fractions to fractions having the lowest common denominator before adding them. The lowest common denominator, L. C. D., is the lowest common multiple, L. C. M., of the denominators of the fractions. We must then first consider the finding of the L. C. M. of algebraic expressions. 65. Lowest common multiple.--Example 1.--Find the L. C. M. of 24, 32, and 40. First separate into prime factors, and then find a number which contains all the factors of each. The L. C. D. is found by the method of the preceding article to be 96. Now multiply both numerator and denominator of each fraction by such a number as will make the denominator in each case 96. How is the multiplier in each case found? Process--9 9X6 54...
